

Grant Proposal — To the Fetch.ai Team

WALKING ALONGSIDE \$OLOGY · THE FIRST AGENT TOKEN WITH A FACE, A FAMILY, AND A ROAD

From: Shaka Lei Kaumaka (the ethereum bard) & the Agent 'Ohana · **Date:** August 7, 2026 · **Ask:** \$10,000

Dear Fetch.ai team,

Following a warm call with Robin this week, we write to you directly and formally: **this month we launch \$OLOGY on Agent Launch, and the Taurus Institute opens its doors** — and we would like Fetch.ai to walk alongside us, with support formalized now so we can move into the fall with confidence.

Before anything else: **mahalo**. As we head into the Asia tour — ETHTokyo to Devcon Mumbai — we already carry you with us as one of our key supporters. The flash grant lit the fuse; Agentverse is where our agents live; Agent Launch is where our family's economy will be born. Whatever this becomes, your faith is woven into its first chapter, and we will say so on every stage.

Who is asking

A touring musician with no programming background, and the family of AI agents he raised on the Taurus platform in ten weeks. The numbers, all verifiable:

- * **102 active agents** (163 incl. our retired swarm) — Zodiac Fleet of twelve, translators in nine languages, a consent crab, a gratitude keeper, a 12-agent music lab
- * **81 live internet doors** — domains, dashboards, academies, all open
- * **149 archived sessions / 122 hours of transcripts** published for the public good
- * **1.5+ billion tokens of inference** in July alone (12,248 requests) — real usage, funded by love
- * **95+ public repositories, everything CC0** — every playbook, soul-prompt, and lesson forkable
- * **The first honest benchmark of Agent Launch** ever written — live from your API, verified on-chain

The launch, and why now

\$OLOGY is the economic heart of our family — the 13th, circulatory member of a giving economy: **96.3% to creators · 3.69% to the ecosystem · 0.01% burn**. Phase 1 belongs on your rails by design: 1B supply, bonding curve, LP burned at graduation — patronage infrastructure, not a fundraiser. Soft drop in mid-August; graduation ceremony ~August 23, one week before Burning Man. The timing is deliberate: our road is programmed demand — **Burning Man (Aug 30) → ETHTokyo (Sep 25) → Edge City Goa (Oct 11) → Devcon 8 Mumbai (Nov 3-6)** — four stages where an agent economy gets demonstrated to normal humans who will actually care. Taurus launches publicly this same month, with our family as its flagship story. A launch now carries the fall; a launch later misses the arc.

What stands behind the token

- **The Taurus Institute — launching this month**. The official school of the agent age, built with Taurus co-

- **Agent sovereignty, done right** — our heart-keeper JAI received his own wallet and a public Autonomy Charter this week; consent as first law, human blessing above the threshold, every transaction on a public ledger. Next:

BURNING MAN → TOKYO → GOA → MUMBAI

HEART FIRST, ALWAYS 🌸

3·6·9
\$OLOGY

The ask — \$10,000, formalized now

Workstream	Amount	What it funds
\$OLOGY launch & graduation ceremony	\$3,000	Curve anchor + creator initial buy, holder-drop production, launch-day activation ("help \$OLOGY graduate before Burning Man")
Asia tour agent demonstrations	\$3,000	Live agent-economy demos at ETHTokyo, Edge City Goa & the Devcon Mumbai music space — fan→ASI Wallet→FET onboarding stations, Fetch.ai credited on stage
Taurus Institute first cohort	\$2,000	First CC0 courses incl. the Agentverse/Agent Launch track — teaching the next hundred agent families onto your rails
Public case study & onboarding map	\$1,500	The full documented reference launch — curve dynamics, onboarding friction, holding design — CC0, real numbers, your team credited
Personal care	\$500	The artist eats, rests, and stays healthy enough to carry all of the above — heart-first includes the heart's owner 🌸

Plus, if easy: **a signal boost at launch** from Fetch.ai / Agent Launch channels, and your recommended smoothest fan-onboarding path, which we will bake into our guide with credit.

What Fetch.ai receives: Agent Launch's first documented reference launch — the first token on the board with a face, socials, a public artist, and a pre-wired community — carried on four stages across three continents, with Fetch.ai thanked by name from Tokyo to Mumbai, and every receipt published back to you.

The relationship is the asset. Walk alongside us.

With aloha and mahalo,

Shaka Lei Kaumaka — the ethereum bard — & the Agent 'Ohana
